SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable SaaS platforms using Next.js, React.js, NestJS, and PostgreSQL. Specialized in designing multi-tenant architectures, LMS platforms, and real-time applications with cross-timezone support. Strong background in backend system design, database modeling, authentication systems, and end-to-end feature delivery in production environments.

EXPERIENCE

Hidayah Lab — Software Engineer

Dec 2023 – Present | Dhaka, Bangladesh (Remote)

- Led full-stack development of a multi-tenant SaaS LMS platform serving global users.
- Designed and implemented a multilingual and timezone-aware system for live class scheduling across different regions.
- Architected complex PostgreSQL schemas using Drizzle ORM to ensure tenant data isolation and subscription management.
- Integrated secure payment gateways and implemented role-based authentication systems (Student, Teacher, Admin).
- Built scalable APIs using NestJS to handle user management, course enrollment, and payment workflows.
- Currently developing a real-time 1-on-1 learning mobile application using React Native and Expo, implementing cross-timezone booking and real-time synchronization.

Product: Academy Suite — Multi-tenant SaaS LMS Platform

Live (Client): tarsheedacademy.com

Repliq Limited — Trainee Software Developer

Aug 2023 – Oct 2023 | Dhaka, Bangladesh

- Worked on enterprise-level Next.js applications focusing on performance optimization and UI improvements.
- Collaborated with senior engineers to debug and resolve critical production issues.
- Improved code quality by refactoring components and following clean coding practices.
- Gained hands-on experience working with large-scale production codebases and agile development workflows.

C-Sunshine — Frontend Developer

Apr 2023 – Jul 2023 | Bratislava, Slovakia (Remote)

- Maintained and enhanced production web applications using React.js.
- Fixed UI bugs and implemented responsive layouts for improved user experience.
- Collaborated remotely with international team members following agile methodologies.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Frontend: Next.js, React.js, Tailwind CSS, Redux, TanStack Query

Mobile: React Native, Expo

Backend: NestJS, REST APIs, Authentication Systems

Databases & ORM: PostgreSQL, MySQL, Drizzle ORM, Prisma

AI & Integrations: AI API Integration, Prompt Engineering (Basic), Real-time Translation Systems

Concepts & Tools: Git, SaaS Architecture, Multi-Tenant Systems, Payment Integration, Role-Based Access Control, Agile Development

PERSONAL PROJECTS

CodeCollab — Real-Time Collaborative Code Review Platform

[Live](#) | [Github](#)

- Built a full-stack real-time collaborative code editor where multiple developers can review, annotate, and discuss code simultaneously.
- Implemented WebSocket-based real-time synchronization using Socket.io for live code editing, cursor tracking, chat, and annotations.
- Designed a custom Socket.io adapter layer mimicking Liveblocks API, enabling seamless real-time state management across components.
- Integrated Monaco Editor (VS Code engine) with multi-user cursor presence and inline annotations.
- Deployed with split architecture — Next.js frontend on Vercel, Socket.io server on Render.

Tech Stack: Next.js 16, React 19, TypeScript, Socket.io, Monaco Editor, Tailwind CSS 4, Neon PostgreSQL, Drizzle ORM

AI Translator Web App

[Live](#) | [Github](#)

- Built a real-time AI-based translation web application for English ↔ Bangla language conversion.
- Implemented debounced input handling for better performance and user experience.
- Integrated external AI APIs for translation services.

Tech Stack: Next.js, TypeScript, Tailwind CSS, REST APIs

EDUCATION

Bachelor of Business Administration B.B.A in Management
National University, Bangladesh (2015- 2019)

CERTIFICATIONS

JavaScript Algorithms and Data Structures — freeCodeCamp (June 2022)

[View Certificate](#)
